

TamlynWrap® Drainable WRB

Tech Support / Sales: 800-334-1676
www.tamlyn.com

HIGH WATER RESISTANCE

Protects the building against moisture intrusion that can lead to the decay of building materials.

SUPERIOR DRAINAGE

Greater than 95% drainage efficiency with 1.5 mm non-compressible filaments. Ideal for use behind stucco, stone, fiber cement and other absorptive claddings.

AIR BARRIER PERFORMANCE

Protects against air infiltration that reduces insulation R-value performance, improves energy efficiency and overall indoor comfort.

VAPOR PERMEABLE (19 PERMS)

Facilitates drying of wall components limiting the potential for mold and water related damage.

DURABLE

Strong non-woven structure provides superior UV (180 days), tear and blow-off resistance.

MULTIPURPOSE

May be used in commercial, multi-family or residential applications. Ideal for use over coated or non-coated sheathing systems.

EASY INSTALLATION

Drainage pattern is omni-directional, so it can be installed in any direction. Non-woven structure is light weight, flexible and easy to integrate with other wall components. The roll size is safer to handle at elevated levels.

SUPERIOR WARRANTY

Backed by a 15 year product or 25 year product and labor limited warranty. Patented technology.

When your building envelope requires a quality layer of protection with added drainage capability, TamlynWrap® Drainable is the right choice for the professional builder, designer or contractor. TamlynWrap® Drainable is a high performance water and air resistive barrier with a unique drainage pattern designed for the harsh conditions of a jobsite and all climate zones. TamlynWrap® Drainable is made from multiple non-woven and barrier layers that provide superior durability, moisture and air infiltration protection with added drainage capability. The unique drainage pattern can remove 100 times more bulk water from a wall versus standard wraps offering enhanced moisture management and drying. The tough non-woven structure is backed by an industry leading warranty of up to 25 years making TamlynWrap® Drainable the right choice for your residential, multi-family or commercial project. TamlynWrap® Drainable is unique in its development for focusing on improving building performance as well as the installation quality and jobsite safety.
