

FEATURES/BENEFITS

- High mechanical properties
- Resistant to UV degradation
- Low VOC: non-hazardous and environmentally friendly
- Fast curing time (60mins at 77°F)
- Universal water proofing solution
- Permanent solution under ponding water
- Exceptional elongation and tensile strength
- Excellent adhesion on wet and damp substrates
- Can be subjected to light foot traffic after full cure (7 days).
- Permanent solution for above/below grade areas including water features walkways, swimming pools, and retaining walls

Tamlyn® XtremeCOAT is a high strength, Two-component fast curing, hybrid Urethane roof coating. **XtremeCOAT** is a low viscosity highly penetrative coating which upon curing forms a flexible membrane, making it highly suitable for all types of waterproofing applications on various substrates. **XtremeCOAT** has excellent adhesion on all suggested substrates and can also be applied on wet and damp surfaces.
