

FEATURES / BENEFITS

- Easy Installation
- Water-tight seal
- Ring lines allow for multiple penetration sizes
- Breathable & Flexible
- Easily integrates into any building envelope system
- Cost Effective
- Helps meet air barrier system requirements

TAMLYN ProSeal™ provides a lasting, economical solution to sealing various penetrations that come through a building's exterior walls. These seals are flexible and slide over pipe, wiring, HVAC or other penetrations to form an instant seal. Each unit also comes conveniently equipped with score lines to accommodate multiple sizes. The patented central seal is surrounded by a membrane, both of which easily integrate into any building envelope system.
